EDUCATION

DE LA SALLE LIPA

2022 - 2026

Bachelor of Science in Computer Science

- Dean's Lister
- Best Thesis Awardee - Bronze

EXPERIENCE

Freelance Frontend Website

Tech Stack: React, TypeScript, Tailwind CSS, React Router

- Designed responsive web interfaces optimized for mobile, tablet, and desktop, featuring a filterable product catalog with category/material filters, multi-image galleries, and detail views
- Implemented custom client-side routing logic (React Router) with smooth hash-based scroll navigation between pages and page sections

Credit Card Scoring Risk Prediction

Tech Stack: Python, Scikit-learn, Tensorflow, Keras, FastAPI, Streamlit

- Developed and evaluated multiple machine learning models, including Logistic Regression, Neural Network, XGBoost, RandomForest, and LightGBM, to predict good or bad behavior based on their demographics, and etc.
- Implemented an interactive dashboard using Streamlit and integrated using FastAPI for efficient and scalable deployment within the company.

Household Electricity Monitoring with Bill Prediction and Recommendation System

Tech Stack: React, React Native, TypeScript, Python, FastAPI, Flask, MongoDB

- Developed a mobile application using React Native with API and MongoDB for real-time household monitoring of electricity consumption with the use of smart plugs.
- Developed a linear regression model to predict monthly household electricity bills, to help provide residents with detailed consumption breakdown to help prevent bill shock.

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, TypeScript

Frameworks & Libraries: React, React Native, Vite, Tailwind CSS, Node.js, FastAPI, Flask, Streamlit

AI / Machine Learning: NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Pandas, Ollama

Developer Tools: Git, GitHub, Figma, Visual Studio Code, Vercel
